EDUCATION

American River College

Aug. 2024 – Present

A.S. in Computer Science; Transfer planned (Expected Graduation 2029)

Sacramento, CA

- **Relevant Coursework:** Data Structures, Algorithms, Object-Oriented Programming (C++), Linear Algebra, Differential Equations, Calculus-Based Physics

EXPERIENCE

HUMANBULB

Jun. 2026 – Aug. 2026

Green Careers Launchpad Intern

Sacramento, CA

- Worked with a team of interns to plan youth STEM events and develop ideas to increase local engagement.
- Maintained and operated multiple Creality 3D printers to produce functional parts and prototypes for internal projects.
- Assisted in developing an internal clock-in application by testing features, fixing bugs, and contributing to front-end development.

American River College TRIO SSS

April 2025 – Present

Student Ambassador

Sacramento, CA

- Assisted students and staff with technical issues, including software troubleshooting, network setups, and workshop technical support.
- Welcomed students, managed front desk operations, and checked in students for academic advising.
- Enhanced the TRIO Canvas portal using HTML and CSS to improve navigation and user experience.

PROJECTS

Tetris Clone | C++, SFML

- Built a fully playable Tetris clone in C++ with SFML, implementing piece rotation, collision detection, line clearing, and speed scaling.
- Added audio/mute controls and next-piece preview while refactoring the codebase into a modular multi-class architecture.

Mandelbrot Fractal Graph | C++, SFML

- Implemented complex-plane coordinate mapping between screen pixels and mathematical coordinates for real-time fractal rendering.
- Utilized OOP principles to encapsulate rendering, coordinate transformations, and fractal calculations.

Clock-In App | TypeScript, React

- Collaborated in a 3-developer team to build an automated intern time-tracking application that streamlined attendance management and payroll reporting.
- Developed responsive React and TypeScript interfaces with role-based dashboards for interns and administrators, improving usability and bi-weekly hour tracking.
- Worked with Git and GitHub in a team environment to implement features, resolve bugs, and review code throughout development.

ACTIVITIES

Code the Dream

July 2025 – Oct. 2025

Student

Remote

- Completed intensive coursework in HTML, CSS, and JavaScript, building responsive web applications.
- Developed a web application integrating a public API to dynamically fetch and display data and media.

SKILLS

Programming: C++, Python, JavaScript, HTML, CSS, SFML

Platforms: Windows, MacOS, Linux

Tools & Technologies: Git, GitHub
